FOR IMMEDIATE RELEASE

Pinecrest to host second Stormwater Management Master Plan Resident Workshop

Pinecrest, Fla. – Pinecrest will be hosting a Stormwater Master Plan Resident Workshop on Tuesday, March 3rd from 7:00 to 9:00 p.m. at Evelyn Greer Park, 8200 SW 124th Street. Residents who are unable to attend, can email stormwater questions to stormwaterinfo@pinecrest-fl.gov.

Updates since the first workshop held last September will be discussed, including the Stormwater Master Plan project development and flood area ranking. The workshop will commence with a brief presentation by engineering consultants who will present priority areas and the methodology used to identify those areas.

Pinecrest began the process of developing a Stormwater Master Plan last fall to identify the current flood protection and water quality level of service. The Village has been diligently working with engineering consultants to assess the current stormwater management system, minimize the potential for flooding, and to maximize resident, business owner, and visitor safety.

As part of the Village's continuing efforts to effectively manage stormwater and mitigate flooding within the Village, various programs will be implemented to maintain, evaluate, and improve the current stormwater management systems. Once completed, the Stormwater Master Plan will include a 5-year stormwater Capital Improvement Plan which will prioritize stormwater problem areas and identify the capital expenditure required to implement and maintain projects in those areas.
