

DRAFT: Pinecrest Strategic Plan

Prepared by **melissa hege city planning llc.**

04.19.2010

TABLE OF CONTENTS:

Section One: Purpose 1

Section Two: Vision Statement 2

Section Three: Priorities and Areas of Opportunity 3

Section Four: Conclusions 14

Section Five: Appendix 15

Section One

Purpose:

In October 2009, the Village of Pinecrest committed to developing a five-year strategic plan, to create a short-term vision for the community. This document provides a framework to direct the Village's efforts and actions and to inform the budgetary process for the next five to eight years. Through this strategic planning process, the community and its leaders have prioritized six areas of opportunity and key intended outcomes ranked in order of importance:

1. Organizational Excellence and Financial Stability
2. Security and Pedestrian Safety
3. Residential Character and Community Enhancement
4. Recreation and Infrastructure
5. Cultural Value
6. Environmental Sustainability

The priorities can be measured annually or biannually using quantitative performance indicators and are summarized in the Village's Vision Statement, a Mission Statement of how to achieve the Vision, and Core Values. In addition, each key intended outcome demonstrates a material benefit to the community.

Public Process:

These priorities were developed with guidance from the community, Village Council, and staff, and managed by the Village's strategic planning consultant. Through initial interviews with each Village Council member and subsequent interviews with the Office of the Village Manager and Department Heads, we were able to create a preliminary list of opportunities and concerns. These concerns were then tested with the public in a series of publicly advertised focus groups. Participants' responses were subsequently used to develop a 42 question survey which the City Council, the Office of the Village Manager, the strategic planning consultant, and a professional survey consultant reviewed and revised before conducting a survey of 400 households.

The statistically valid survey used a phone listing of 7,608 randomly selected households with a random selection within 24 postal carrier routes for a 95% confidence level. The results were cross-tabulated by demographic data to identify potential trends and were used to develop a list of preliminary areas of opportunity and a vision statement.

After an additional series of interviews with City Council and the Office of the Village Manager, the strategic planner finalized a list of areas of opportunity and vision statement, which were presented as part of a five-hour Council of the Whole (COW) workshop. The draft, which resulted from this workshop, was made available for public comment, presented in a second COW workshop, and approved by Council in a public meeting. This process balanced input from active community members with a statistically valid cross section of the community to provide the most accurate gauge of community interest and concerns.

Outcomes:

In general, the community is very happy with the Village operations, amenities, services, and infrastructure. They like the Village's appearance, the quality of the schools, and the safety and security within close proximity to Miami. There was some interest in providing more lighting, sidewalks, bikeways, and a dog park, however there was no clear group who was overwhelming for or against these amenities. There was also a small group of respondents (16%) who thought the existing regulations were too restrictive. There is strong support for improving Pinecrest Gardens and the Banyan Bowl for cultural and educational activities and there was an overall theme to provide more opportunities for community interaction. A summary of the survey findings can be found in Appendix A of this report.

Section Two

Vision Statement:

The Village of Pinecrest is a highly livable community with an excellent government, stable finances, safe streets, outstanding recreation facilities and infrastructure, a high-quality residential character with lush streetscape, excellent schools, valuable cultural assets, and sustainable operations and living, with leadership which progressively enhances opportunities for citizen interaction and participation.

- **Organizational Excellence and Financial Stability**

Maintain efficient and responsive government which embraces the highest standards of service and citizen engagement and commits to the goals of the strategic plan.

- **Security and Pedestrian Safety**

Maintain our standard of police service and enhance safety for pedestrians and bicyclists.

- **Residential Character and Community Enhancement**

Maintain the appearance of the Village and the quality of life for residential living by preserving the streetscape, minimizing impacts from commercial development, protecting the caliber of our educational institutions, and planning for the future needs of our community.

- **Recreation and Infrastructure**

Continue to provide a high standard of parks and infrastructure to best serve our community and plan for future demand as our community needs change.

- **Cultural Value**

Improve the amount and variety of arts and culture in the Village to provide opportunities for community interaction and enrichment.

- **Environmental Sustainability**

Minimize our community's impact on the environment with increased energy efficiency and growth management policies.

Mission Statement:

Our mission is to sustain a vibrant village that builds a sense of community spirit and pride with fiscally responsible government, the highest quality municipal services and infrastructure, a responsive and efficient staff, and innovative leaders who engage our residents.

Core Values:

1. Fiscal responsibility
2. High quality services and amenities
3. Supporting excellence in education in the public schools
4. Protecting neighborhood character
5. Health, safety, and community well being
6. Sustainability

Section Three

Priorities and Areas of Opportunity:

1. Organizational Excellence and Financial Stability

Maintain efficient and responsive government which embraces the highest standards of service and citizen engagement and commits to the goals of the strategic plan.

When voters approved the Village's incorporation in 1995, their vision was for local government to be lean, efficient and responsive to the population's needs and to make their own decisions on how municipal taxes were spent. Historically, Miami-Dade County municipalities seeking incorporation wanted the ability to control and influence spending so that there would be a more direct infusion of investment and services in their neighborhoods. This sentiment continues to be a priority for the Village Council and the community. In fact, the Village Council indicated that maintaining healthy reserves and maintaining the millage rate were the most important outcomes for organizational excellence and financial stability.

The Village Council ranked organizational excellence and financial stability as the most important priority in this Strategic Plan. Organizational excellence is the structure which runs the government. In the Village of Pinecrest, the Village Council is vested with all the legislative powers and the Village Manager is responsible for the administration of all Village affairs. The citizen's survey indicated an extraordinarily high satisfaction with government employees and service in the past 6 months. There was nearly equal satisfaction with the value of services for the amount of taxes paid. Residents were also very satisfied with the amount of information communicated to them. The Village should continue to provide high quality information to the community by expanding web-based services like permitting and soliciting continued input through citizen committees. But ensuring continued satisfaction is dependent on adequate funding for these services through financial stability.

Financial stability is based on healthy reserves and long-term security. When Pinecrest incorporated, the revenues from ad valorem taxes steadily rose due to increases in property values, until quite recently when the economy turned. Because 86.78% of the Village's taxes are generated from residential property, the Village tax base is very much affected by the dip in home values. As this downward trend in home values continues, the Village is investigating alternative revenue sources to diversify its income structure, continuing to identify and pursue grants and other alternative sources of income, and by cultivating and maintaining financial support from local businesses and the community.

Key Intended Outcomes

- Maintain healthy reserves.
- Maintain the millage rate at an acceptable level to maintain continued high quality services.
- Establish a Strategic Plan to prioritize areas of opportunity for the next five years.
- Develop innovative strategies to diversify and strengthen the Village's income base.
- Increase communication and continue to provide accessible and high quality information to the community.

Performance Indicators

- Annual comparison of unrestricted reserves to the operating budget
- % change in millage rate
 - % annual revenue increase from new sources
 - # of transactions on Village website for e-business
 - maintain a 90% positive rating with amount of information provided
 - maintain a 95% positive rating with employee service

Survey Results:

- 92% positive rating for the value of services received
- 91.5% are satisfied with the amount and means of information provided
- 96.8% of respondents who came into contact with Village employees in the past six months indicated that employees demonstrated a helpful attitude

2. Security and Pedestrian Safety

Maintain our standard of police service and enhance safety for pedestrians and bicyclists.

Village residents who voted for incorporation had a vision for safer streets with highly visible police patrols, which was described in the incorporation study and charter review public hearing as “saturation police protection”. The Village Council continues to identify police protection as the most important service provided to the community to be maintained, and residents agree. The citizen survey indicated safety and security among the top five elements they liked most about living in Pinecrest. In addition, there is a very high level of satisfaction with police service and police response times. Only 3.2% of participants were unsatisfied with the service. To continue to improve and enhance this level of satisfaction in the community, the Village will provide continued interaction with residents, repeating events like Bike Day, and supporting community policing initiatives like Crime Watch, DARE Explorers, and Community Police.

Pedestrian safety is a concern for the majority of residents, according to the citizen survey and reflects a common desire to maintain and improve the Village’s livability. Focus group participants, as well as the Village Council, also place emphasis on evaluating options for increasing pedestrian safety. However, the solutions are less clear. While survey respondents ranked a need for more lighting as their first priority, this represented only 11% of the responses. In addition, a slight majority of residents wanted more sidewalks, bikeways, and streetlights. However, there was no trend in participants’ answers according to age, family size, or tenure in Pinecrest. Therefore, Village Council would like to investigate additional opportunities for pedestrian safety by implementing small and targeted improvements to enhance movement and connectivity in and between neighborhoods and the various parks and schools. Efforts will include an application for the Safe Routes Program Grant to construct additional sidewalks around elementary schools. The Village will also educate the community about opportunities to install additional outdoor streetlights for individual streets by petitioning for special taxing districts.

Additionally, the Village will continue to address neighborhood traffic and transportation issues as they arise with input from the citizen transportation committee. The Village will also continue to explore options to enhance transit in the Village in light of the Transit Circulator System General Feasibility Study and engage discussions with other municipalities to address regional transportation issues. These efforts will enhance overall connectivity for vehicles, pedestrians, and bicycles to continue to improve the Village’s livability.

Key Intended Outcomes:

- Maintain an effective and high standard police force.
- Evaluate where pedestrian safety needs to be enhanced.
- Prioritize sidewalk locations and formally evaluate the need for sidewalks by moving forward with the Safe Routes Program to improve access to schools with new sidewalks.
- Expand the sidewalk initiative to connect neighborhoods to parks in year 2

Performance Indicators

- % satisfaction with police
- % change in crime rates
- % increase in pedestrian safety and perception of safety
- Successful completion of the Safe Routes Grant application
- Successful implementation of the Safe Routes Program recommendations

Survey Results:

- 90.3% respondents are satisfied with police service
- More lighting was 1st priority for what residents identified as needing most improvement. (66% of residents wanted more street lights.)
- Safety was the 2nd highest thing residents liked most about living in Pinecrest.

- 21% wanted traffic calming
- 56.2% of residents wanted more sidewalks
- 54.2 % of residents wanted more bikeways

3. Residential Character and Community Enhancement

Maintain the appearance of the Village and the quality of life for residential living by preserving the streetscape, minimizing impacts from commercial development, protecting the caliber of our educational institutions, and planning for the future needs of our community.

When asked what they like most about living in Pinecrest, the community generally described the overall character and quality of the Village. These characteristics include homes on large lots, abundant landscaping and open spaces, and excellent schools in a residential setting within close proximity to downtown Miami. This emphasis on character and quality was also important to the community when they voted to incorporate. In fact, during the Pinecrest charter review public meeting on December 12, 1995, the community ranked neighborhood beautification and zoning controls as two of four primary reasons for wanting to incorporate. Fifteen years later, residents rated appearance, quiet, location, and schools as four of the top five things they liked most about living in Pinecrest.

Pinecrest has a reputation for flexible residential building regulations which place few restrictions on architectural design and ornamentation. In general, the community likes the degree of flexibility and would like to maintain the current intent of the regulations and even increase flexibility. The citizen survey indicated a fairly high degree of satisfaction with the current codes and ordinances, with some concern that the regulations are too strict. Satisfaction with the level of code enforcement was higher. These standards should ensure that the Village's overall appearance is maintained without impinging on the rights of property owners. However, while the community is generally happy with how their code is working, they are concerned about protecting their neighborhoods from commercial intrusion.

Commercial development is only permitted on US1. The current zoning for US1 contains commercial uses and limits physical intrusion into residential neighborhoods. While the current zoning and future land use regulations severely limit commercial intensity along the corridor, they have been challenged by the County, the State, and some property owners who believe that the corridor should support larger populations and more significant building uses in coordination with the transit system. In general, the community is satisfied with the quality, type, and appearance of businesses on US1, but there is also some interest in redevelopment indicated by more than 1/3 of the survey participants. In light of these factors, a majority of the Village Council is in favor of being proactive and engaging the community in a conversation about the corridor's future which could then be memorialized as a current vision plan on record in response to the County, State, and property owners. This will at least need to be addressed in the State mandated Comprehensive Plan update for 2012.

The Village's high quality educational institutions are one of the most significant factors contributing to property values. In recognition of this asset, the Village is committed to partnering with the Miami-Dade County School Board to foster the highest quality schools by promoting facility upgrades, community programming, and continuing to provide resources to the community's public schools.

Key Intended Outcomes

- Maintain high quality code enforcement for residential and commercial properties without impinging on property rights and continue to maintain the appearance of vacant and foreclosed homes.
- Initiate a community conversation about a future vision for US1.
- Continue to uphold Resolution 2010-12 to urge the Department of Environmental Protection to suspend FPL's site certification application for Turkey Point units 6 and 7 with regard to overhead high voltage transmission lines on US 1 to connect the Turkey Point Power Plant to Downtown Miami, and Resolution 2010-13 opposing FPL's plan to place overhead high voltage transmission lines on US 1 to connect the Turkey Point Power Plant to the Downtown Miami substation including urging the placement of

underground lines within the Village of Pinecrest and requesting the Public Service Commission revisit its opinion with regard to the underground costs.

- Review land development regulations for US1.
- Maintain the landscape ordinance and preserve streetscape to maintain a lush, consistent, full coverage, street tree system and tree canopy.
- Continue the Adopt-A-Tree Program
- Review the landscape ordinance for emphasis on the aesthetic value of trees.
- Finalize an education compact with Miami-Dade County Public Schools to expand resources and attract more Pinecrest residents to public schools and continuing to provide school resource officers.

Performance Indicators

- % of foreclosed homes being adequately maintained
- % increase in overall tree coverage or # of new trees planted by the Village
- # of new school resources directly attributable to the Village
- % increase in citizen satisfaction rating regarding codes and ordinances

Survey Results:

- Education, appearance, and quiet were the top 5 things residents liked most about Village.
- 75.8% responded Pinecrest codes and ordinances that regulate use of property as just about right
- 91.9% are satisfied with the level of the Village's Code Enforcement
- 82% rated the appearance US 1 positively
- 87.3% rated the quality of business positively
- 35% favor future redevelopment of US1

4. Recreation and Infrastructure

Continue to provide a high standard of parks and infrastructure to best serve our community and plan for future demand as our community needs change.

One recurring theme from the Strategic Planning exercise is a desire for more community interaction and increased opportunities for informal community encounters. The survey indicated that most residents are satisfied with the number and types of parks in the community. Of the different recreation facilities suggested as part of the survey, participants responded most favorably to creating a new dog park. Participants also rated a need for neighborhood pocket playgrounds 12% to 7% higher than a need for all other types of facilities including soccer fields, baseball fields, football fields, tennis courts, swimming pools and gymnasiums. Both neighborhood pocket playgrounds and dog parks facilitate passive and informal recreation.

There are also opportunities to enhance the 19.86 acre area encompassing Pinecrest Gardens, the Community Center, the Library, and Village Green for community activities. Providing outdoor amenities, like seating and shade, to the Community Center/Library Complex, would increase usage of these public spaces and foster community interaction, as well. These improvements should be coordinated with the findings from the Community Center Operations Audit.

But the Village's demographic is continuing to change. When asked, what the future population of Pinecrest might look like, Village Council suggested a combination of more young families and retirees who may have an increased demand for parks. In anticipation of these future needs and an interest in improving the level of service of parks and park activities, the Village Council is pursuing an unusual opportunity to purchase nine acres of undeveloped land owned by the Archdiocese of Miami located on the corner of SW 124th Street and SW 72nd Avenue. This purchase should be evaluated as part of a long term vision for green areas in the Village and should be coordinated with the 2012 Comprehensive Plan Update.

Finally, while most infrastructure needs are being met at a satisfactory level, the Village is committed to providing public water to all residents and maintaining high quality infrastructure to residents and will continue to pursue State and Federal funding for this effort.

Key Intended Outcomes

- Evaluate recommendations from the Community Center Operations Audit and develop programs and plans based on these recommendations.
- Provide public water to all Pinecrest residents and seek support from the State and Federal Government as the Village's highest priority lobbying effort.
- Develop long-term vision for green areas to continue to provide a high standard of parks as the community needs change.
- Evaluate the feasibility of expanding the Community Center by undertaking a full operational assessment.

Performance Indicators

- % satisfaction with park facilities
- % increase in number of community center and plaza patrons

Survey Results:

- 94.6% satisfaction with infrastructure
- 30.5% responded that there is a need for pocket neighborhood playgrounds
- 23% responded that there is a need for more tennis courts
- 20.5% responded that there is a need for soccer fields
- 19.8% responded that there is a need for more baseball
- 19.5% responded that there is a need for swimming pool
- 18.3% responded that there is a need for gymnasium
- 17.3% responded that there is a need for more football

- 52% responded that the Village should develop a Dog Park

5. Cultural Value

Improve the amount and variety of arts and culture in the Village to provide opportunities for community interaction and enrichment.

Cultural amenities and programming ranked highest of all topics on the citizen survey. Participants demonstrated a clear interest in programming the Banyan Bowl, increasing educational activities at Pinecrest Gardens, providing art and culture, and returning the restaurant facility to Pinecrest Gardens. These improvements will provide more opportunity for community interaction. The Village has a very clear set of directives for the facility including reducing the gap between revenues and expenditures, defining an overall vision and master plan for Pinecrest Gardens, working with a professional to evaluate the market for basic and simple restaurant facilities and a food kiosk at the community center plaza, and following the recommendations from the AMS Banyan Bowl evaluation report, in addition to increasing opportunities for ADA compliance.

Building from this interest in culture and community, the Village Council recognizes that Pinecrest Gardens, the Community Center, and the Library, and the Village Green together, represent a real opportunity to foster community interaction. With the success of the Farmer's Market and community support for reviving Pinecrest Gardens as a cultural amenity, this facility can become an anchor for community activity and interaction. Improvements to the open spaces for recreation and relaxation will solidify this opportunity.

The Village Council has identified additional opportunities to respond to the community's interest in culture and community programming including initiating more Village-wide holiday events and community events like parades and picnics, creating monthly art exhibits which rotate between the Community Center and the Hibiscus Room at Pinecrest Gardens, and continuing to provide art in public places.

Key Intended Outcomes

- Update and consolidate the various plans for Pinecrest Gardens to create a unified vision.
- Develop and implement a business plan that will enhance Pinecrest Gardens' value to the community by offering horticultural, cultural, and educational programs; building a membership and volunteer base; and reducing the gap between income and expenses.
- Develop extensive programming that is revenue generating. This programming should be a mix of Village sponsored and outside sponsored programming.
- Open food service operations at Pinecrest Gardens based on a market recommendation to enhance the visitor experience.
- To strengthen our community, explore opportunities for community-wide events and seek sponsorship.
- Evaluate recommendations from the Banyan Bowl Study.
- Facilitate arts in public places and gallery events.

Performance Indicators

- % reduction in gap between Pinecrest Gardens revenues and expenses
- Attendance at Pinecrest Gardens
- Attendance rates at special events and programs in Pinecrest Gardens
- % increase in attendance at gallery events at Pinecrest Gardens and the Community Center
- % increase in attendance at community events

Survey Results:

- 70% responded that restoring restaurant operations was important or very important
- 69% responded that botanically related events and activities in Pinecrest Gardens were important or very important

- 74.2% responded that cultural/entertainment events in Pinecrest Gardens were important or very important
- 74.8% would attend weekend events at the Banyan Bowl
- 55.5% would spend up to \$25 to attend events

6. Environmental Sustainability

Minimize our community's impact on the environment with increased energy efficiency and growth management policies.

The Village Council is committed to reducing the Village's impact on the environment by modifying Village operations and setting policy for more sustainable growth and development practices for the built environment. To fulfill this goal, the Village will administer sustainable initiatives to identify strategies to be more energy efficient and to promote policies for sustainable growth as outlined in Resolution 2010-1 including adopting a Green Plan of Action and Sustainable Procedures policy to promote green procedures for environmentally preferable green products and services, a recycling program at Village parks and recreation facilities and in Pinecrest Gardens, staff development and training in sustainable practices, and to evaluate the current land development regulations to ensure new development, both public and private, is consistent with the Village's desire for a more sustainable community. These strategies can be incorporated into the Village's Comprehensive Plan update which also contains new State mandates originating from House Bill 697 to reduce green house gases.

Many of the directives in this Strategic Plan also support this general priority of sustainability by investing in the current infrastructure, continuing to provide excellent parks and accessibility to open space, increasing pedestrian safety and safer streets for walking and biking, focusing efforts to create a greater sense of community through culture and community programming, and providing fiscal sustainability.

Key Intended Outcomes

- Investigate creating a sustainable and energy efficient land development code
- Change operations to be more energy efficient
- Retrofit municipal buildings for energy efficiency
- Encourage or require more landscape of commercial corridor.
- Maintain Tree City USA status.
- Develop a Green Action Plan and implement the approved recommendations.

Performance Indicators

- % reduction in energy consumption and use of natural resources for residents and businesses by measuring carbon footprint using ICLEI (International Council for Environmental Initiatives) standards.
- % reduction in government operational related energy consumption and use of natural resources

Section Four

Conclusions:

The Village will seek achieve the following goals in the next five to eight years using the key intended outcomes and performance indicators outlined within this Strategic Plan:

- **Organizational Excellence and Financial Stability**

Maintain efficient and responsive government which embraces the highest standards of service and citizen engagement and commits to the goals of the strategic plan.

- **Security and Pedestrian Safety**

Maintain our standard of police service and enhance safety for pedestrians and bicyclists.

- **Residential Character and Community Enhancement**

Maintain the appearance of the Village and the quality of life for residential living by preserving the streetscape, minimizing impacts from commercial development, protecting the caliber of our educational institutions, and planning for the future needs of our community.

- **Recreation and Infrastructure**

Continue to provide a high standard of parks and infrastructure to best serve our community and plan for future demand as our community needs change.

- **Cultural Value**

Improve the amount and variety of arts and culture in the Village to provide opportunities for community interaction and enrichment.

- **Environmental Sustainability**

Minimize our community's impact on the environment with increased energy efficiency and growth management policies.

These goals will help frame the budgetary process to direct the Village's efforts and actions.

VILLAGE OF PINECREST

MUNICIPAL SERVICES

AND

PLANNING SURVEY

JANUARY 2010

**VILLAGE OF PINECREST
MUNICIPAL SERVICES AND
PLANNING SURVEY
JANUARY 2010
EXECUTIVE SUMMARY**

The Village of Pinecrest retained the firm of PMG Associates, Inc. (PMGA) to create and complete a survey of the City's residents to determine their attitudes and perceptions toward municipal services and a plan for the future. The survey was completed and was able to document attitudes, perceptions and opinions the citizens felt during the year of 2009. The sample included a cross-section of the community.

METHODOLOGY

The survey instrument used for this engagement was designed by PMG Associates, Inc. of Coconut Creek, Florida and included input and modification by the Village of Pinecrest.

The sample for this survey was generated using direct mail listings matched with current telephone numbers. This sample generated over 5,000 potential interview subjects. Later, random telephone selection within the universe resulted in the required sample size for this assignment (400). The sampling error associated with this random-sample survey was +/-5 percent at the 95 percent level of confidence.

Respondents were contacted by telephone by the PMGA staff to complete the survey. Telephone calls were made in the late afternoon and early evening during the week and during the day and the evening on the weekends in order to obtain a true representative sampling of the population. All respondents were first qualified to insure that they were in fact Village residents prior to initiating the survey. The staff focused on encouraging the respondents to provide their opinion in order to assist the City in ascertaining perceptions regarding the delivery of services.

Quality control was achieved by examination of completed surveys prior to entry into the database for the statistical software package. The tabulations of the data resulted in preparation of tables defining the attitudes and perceptions of the public regarding the police department.

In the executive summary, percentages given are out of respondents that gave an opinion on a topic. Respondents that did not answer or did not have an opinion were removed from the sample set for purposes of easy comparison

SURVEY RESULTS:

The overall value of services received by the Village of Pinecrest was rated as positive with 92.0% of the respondents whom gave a response stating that they felt that the value was Excellent or Good.

<u>Areas of inquiry:</u>	<u>Positive</u>
Information provided by Village	91.5%
Helpful employees	96.8%
Village infrastructure	94.6%

**VILLAGE OF PINECREST
MUNICIPAL SERVICES AND PLANNING SURVEY
JANUARY 2010**

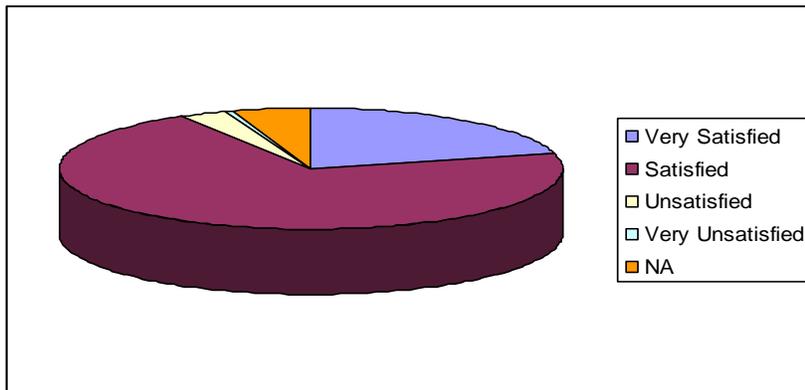

1) How would you rate the value of the services that you receive from the Village of Pinecrest for the tax dollars that you pay?

Response	Number	Percent
Excellent Value	87	21.8
Good Value	281	70.2
Poor Value	6	1.5
Very Poor Value	2	0.5
No Answer/Opinion	24	6.0
Total	400	100.0

2) How satisfied are you with the amount and means of information provided by the Village?

Response	Number	Percent
Very Satisfied	83	20.8
Satisfied	283	70.7
Unsatisfied	12	3.0
Very Unsatisfied	2	0.5
No Answer/Opinion	20	5.0
Total	400	100.0

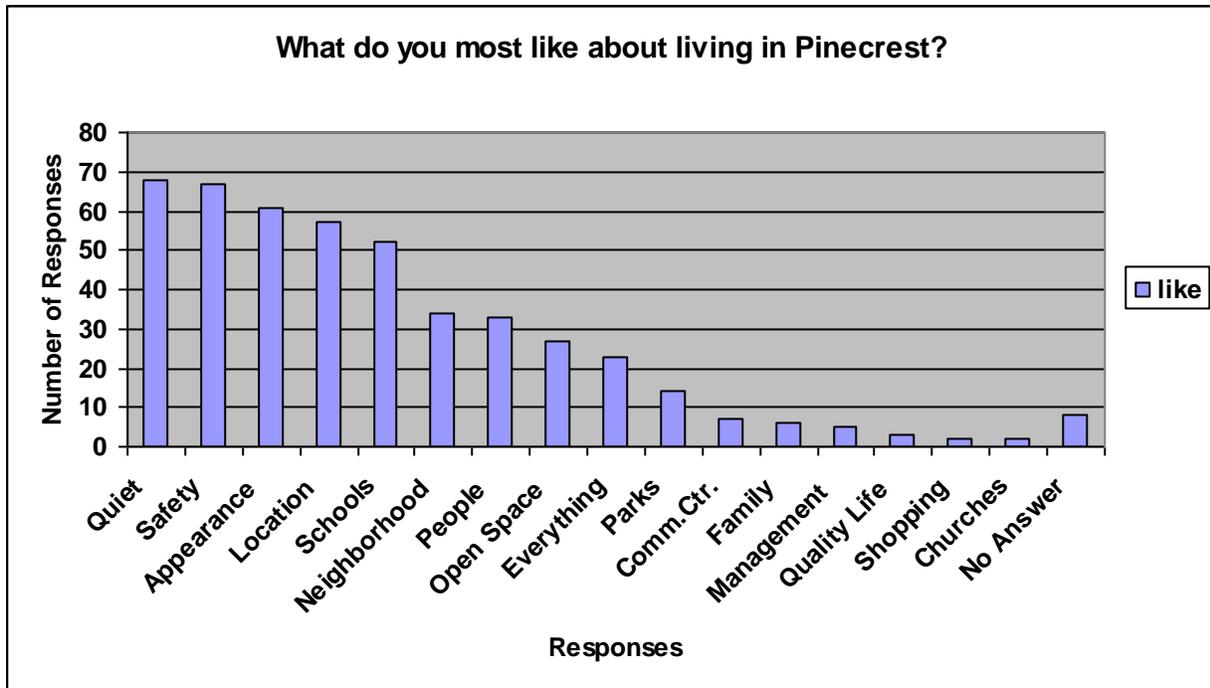

3) If answers Unsatisfied or Very Unsatisfied..... What would be your preferred method of receiving information?

Email	2	Pinecrest paper	1
Mail or email	2	Verbal	1
Flyers/newsletters	2	No answer	5
Mail	1		

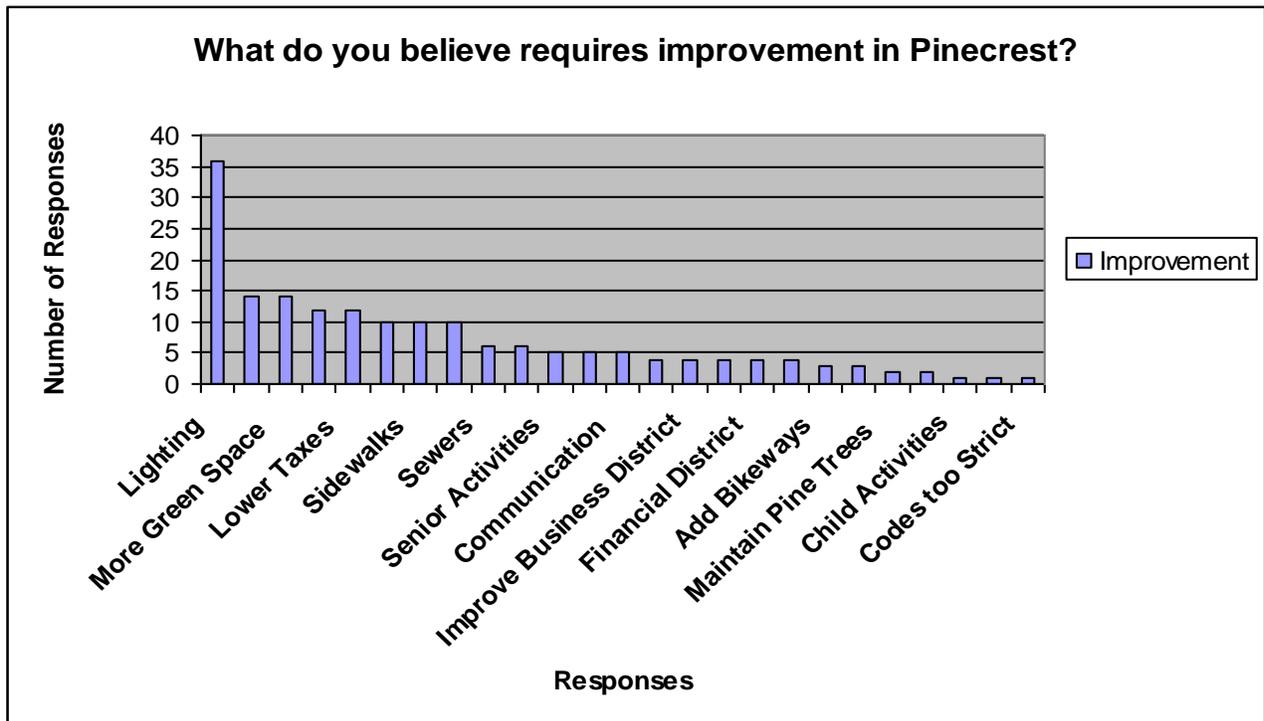

4) What do you like most about living in Pinecrest?
 (68 respondents had multiple answers. Percentages equal over 100% due multiple answers.)

	<u>Number of Answers/Percent</u>		<u>Number of Answers/Percent</u>
Quiet	68/17.0%	Parks	14/ 3.5%
Safety/security of area	67/16.8%	Community center	7/ 1.8%
Appearance	61/15.3%	Family around	6/ 1.5%
Location	57/14.3%	Management of community	5/ 1.3%
Schools	52/13.0%	Quality of life	3/ 0.8%
My neighborhood/the area	34/ 8.5%	Shopping	2/ 0.5%
The people/neighbors	33/ 8.3%	Churches	1/ 0.3%
Open space/has a country feel	27/ 6.8%	No answer	8/ 2.0%
Everything	23/ 5.8%		

5) What do you believe requires improvement in Pinecrest?
(226 respondents did not give an answer)

More lighting	36	Better communication	5
Reduce traffic/improve roads	14	Restrict size of homes	4
Need more green space/trees	14	Improve business district	4
Improve law enforcement	12	Bury utility lines	4
Fiscal responsibility/lower taxes	12	Improve bus/transportation services	4
Improve parks	10	Add bikeways	3
Sidewalks	10	Better security	3
City water needed	10	Maintain pine trees	2
Sewer improvements	6	Add dog park	2
Improve playground equipment	6	More activities for children	1
More activities for seniors	5	Add skateboard park	1
Improve code enforcement	5	Codes too strict	1

6) Have you come into contact with a Village of Pinecrest employee in the last six months?

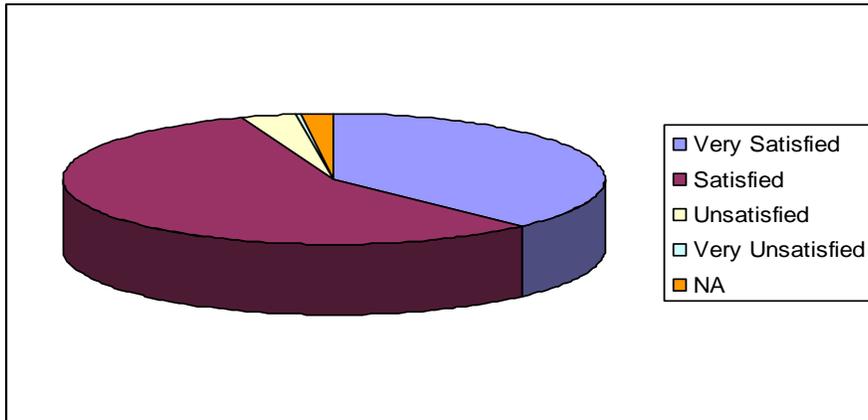

Response	Number	Percent
Yes	156	39.0
No	244	61.0
Total	400	100.0

7) If YES... Regarding the employee that you encountered during your most recent contact with the Village... did that employee demonstrate a helpful attitude?

Response	Number	Percent
Yes	151	96.8
No	3	1.9
No Answer	2	1.3
Total	156	100.0

8) How satisfied are you with how the Villages infrastructure (such as parks, roads, sidewalks and street signs) is maintained?

Response	Number	Percent
